<b>Office Action Summary</b>	<b>Application No.</b> 10/585,152	<b>Applicant(s)</b> LINDSKOG ET AL.	
	<b>Examiner</b> Jorge O. Peche	<b>Art Unit</b> 3664	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 15 December 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### **Election/Restrictions**

This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species 1: Figure 5 drawn to a system for estimating a road condition under a vehicle comprising a wheel speed sensor and an analyzer unit.
- Species 2: Figure 9 drawn to a system for estimating a road condition under a vehicle comprising four wheel speed sensors, four analyzer units and a combination section.
- Species 3: Figure 11 drawn to a system for estimating a road condition under a vehicle comprising a wheel speed sensor, first and second analyzer units and a decision unit.
- Species 4: Figure 13 drawn to a system for estimating a road condition under a vehicle comprising four wheel speed sensor signals, first and second analyzer units and a decision unit comprising a signal change determination section to process first combination section signals.

- Species 5: Figure 14 drawn to a system for estimating a road condition under a vehicle comprising four wheel speed sensor signals, first and second analyzer units and a decision unit comprising a signal change determination section to process output combination section signals.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner where it is necessary to search for one of the inventions in a manner that is not likely to result in finding art pertinent to the other invention (e.g. searching different classes/subclasses or electronic resources, or employing different search queries). The species and corresponding sub-species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claim to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by fee required under 37 CFR 1.17(i).
